#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.  
 2a) This action is **FINAL**.                    2b) This action is non-final.

Art Unit: 3727

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites the limitation the bottom wall and "side walls" in line 9. There is insufficient antecedent basis for this limitation in the claim. Applicants set forth a sidewall with faces.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Scheetz, Jr et al '850.

Note the sloped grooves 40 in the sidewall of the beverage bottle of Scheetz, Jr. et al.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khovaylo et al '021.

Note the design for a beverage bottle by Khovaylo et al which has V shaped grooves in the sidewall which can inherently receive the fingers and thumb when the bottle is gripped.

5. Claims 1-4, 9, 10, 13-18, 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weick et al '127 in view of Sosenko.

Both Weick et al and Sosenko teach beverage bottles with grooves. The grooves of Weick et al are angled and may function to aid in gripping. In any event to have sized the grooves for receiving a finger would have been obvious in view of such teaching by Sosenko at 8. Note that the angle grooves of Weick et al may be discontinuous and lie on one face as at 42 in a generally rectangular container. Note also the recessed bottom of Weick et al in Figure 8.

6. Claims 5-8 and 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 1 and 13 above, and further in view of Krishnakumar et al '990.

To have formed the groove such that it is V shaped would have been obvious in view of such teaching by Krishnakumar et al at 88.

7. Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 9 above, and further in view of Dyer '451.

The position in which the container is gripped is considered to be dependent in part on the size. However to have optionally gripped the container from the bottom with the corner in the palm would have been obvious in view of Dyer.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schmitt, Ramsey, Michalowski, Kamineni et al, Payne et al, Colani, Josephsen et al, Cheng et al Creaver, Muchmore, Platte, Buckely, Van Dyk et al, Schoonover et al and Brown show other containers with grooves and gripping constructions.

9. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
